Project Title: Pink

I would like to build a multi-page website about the color pink. I think the website should show the diversity and beauty of the color pink, which can be found in nature, cultures, history, symbolism, from all over the world. I want the website to show all/most variations of pink in a coherent and eye-catching manner. I request that there be no fuchsia or magenta on the site. Please contact me if you have questions about that. There is a lot of information in the source, so please don't hesitate to ask me about omitting/adding categories or information! If there is too much information in a section, feel free to split this section into two or more. Here are sections I would like to be on the site for sure:

- Homepage
    - Introduction of the color pink(summary, example pictures)
- Different shades of pink
    - There are a lot, so please choose ~10 varying shades!
- Nature
    - Pink found in geology, flowers, animals, etc.
- History
    - This is mostly historical art and culture. I would like you to show where the color is found by the century.
- Culture
    - Architecture, food, other languages, etc.
- Symbolism
    - Gender, stereotypes, social movements, politics, sexuality

Sources: Wikipedia page for "Pink;" any other Wikipedia page relating to one of the categories listed above; "Shades of Pink" Wikipedia page

*The categories listed should be subsections of the Wiki page, so it should be easy to find!
